Subject: Pre-Regulatory Landfill Sites in Davie County

Dear Ms. Dirks:

The General Assembly of North Carolina enacted Senate Bill 1492 which created a program to assess the public health and environmental hazards at landfill and dump sites that operated prior to 1983 and to develop and implement remedial action plans at sites requiring remediation. The Pre-Regulatory Landfill Unit (Unit) was created in the Inactive Hazardous Sites Branch (IHSB) to oversee these activities. The purpose of this letter is to make you aware of the sites identified in your county and to provide general guidance of relevant state statutes.

Based on the information obtained by the Unit, the sites listed below tentatively qualify under Senate Bill 1492.

<i>ID Number</i>	<i>Site Name</i>	<i>Site Address</i>
NONCD0000279	Dalton Refuse Dump	SR 1605, Mocksville
NONCD0000280	Clement Refuse Dump	Walker Road, Mocksville

Work at these sites may be performed using the Unit's resources or through local government actions. The Unit has prioritized the sites statewide based on their threat to public health and the environment and will perform assessments and implement remedial actions based on this priority. Local governments may opt to perform the work at any time under the guidance of the Unit. Reimbursement of local government costs may be available for assessments and remedial actions to abate an imminent hazard as funds are available. The conditions for reimbursement include approval of the assessment and remediation plan by the Unit and certified accounting of costs. A document, *IHSB Guidelines for Addressing Old Landfills & Dumps*, was developed to assist local governments and the Unit in this work. It is available on our web site, <http://portal.ncdenr.org/web/wm/sf/ihs/ihsoldlf>, for your review.

An additional purpose in notifying you of these sites is to provide information to assist in your responsibilities in the permitting of private drinking water wells. The General Assembly enacted legislation which required local health departments to implement programs for the permitting, inspecting, and testing of private drinking water wells by July 1, 2008. State well construction standards in 15A NCAC 2C require a minimum horizontal separation of 500 feet between a water supply well and a landfill or disposal site. More precise location information for the sites in your county may be requested from the Unit.

If you are aware of additional sites, have additional information on the identified sites, or need further information, please email me at analee.thornburg@ncdenr.gov or you can call Bruce Lefler at (919) 508-8463

Sincerely,

A handwritten signature in black ink that reads "Analee Thornburg". The signature is fluid and cursive, with the first name "Analee" being more prominent than the last name "Thornburg".

<SAL> <FIRST> <LAST>, County Manager
County of <MUNICIPALITY>
<ADDRESS>
<TOWN>, North Carolina <ZIP>

Subject: Assessment, Cleanup, and Redevelopment of Old Landfill Sites Within Your Jurisdiction

Dear <SAL> <LAST>:

Governor Easley released his proposed budget February 22, 2007. Included in the budget is a specific item I believe should be of interest to you from a fiscal, environmental and public health protection perspective.

There are approximately 700 old landfills statewide and <LANDFILL#> old landfills in your local area that closed before the State permitting system became effective. These landfills are listed on the Old Landfill Sites portion of the Inactive Hazardous Sites Inventory maintained by the Superfund Section, Division of Waste Management. Any person, including local governments, that arranged for disposal or disposed of waste in the landfills may be held liable for the cleanup of the site. I have attached a report that identifies the location of known old landfill sites in <COUNTY NAME> County that may have closed prior to 1983 and thus qualify for the program described in this letter.

The Division has surveyed old landfills in 47 counties. The results of the survey indicate reason for concern about potential public health and safety impacts of these sites if they are not addressed. Seventy percent of the sites surveyed had a school, church, residence, day care or drinking water source within 1000 feet. The Division has found 102 old landfills that have a drinking water well within 500 feet. Thirteen of the landfills surveyed have residences built over the old landfill. The cost of assessment and cleanup of these old landfill sites can be as high as several million dollars.

Governor Easley's budget establishes a partnership between the State and local governments to both clean up the old landfill sites and provide funding for redevelopment of the sites. Many are in prime locations for redevelopment opportunities. The Governor's budget proposes to pay for cleanup and redevelopment of these sites through a surcharge on disposal of solid waste. The funding mechanism is a fair one. It is based on the idea that those who use solid waste disposal facilities should share responsibility for cleanup of sites used for solid waste disposal in the past that may have been lawful at the time, but did not meet standards that we now know are necessary to protect public health and safety.

The proposed \$2.00 per ton disposal surcharge would apply to residential, commercial, industrial, and construction and demolition debris type waste that is either disposed at a landfill or passes through a transfer station for disposal out-of-state. The State would use revenue from the surcharge to contract for cleanup of the old landfill sites and to provide grants to local government for redevelopment. The funds could also be used across the state to clean up other hazardous substance disposal sites that have no viable responsible party.

The only tool currently available to the State to ensure cleanup when it is needed is an enforcement action against those who owned, operated, or contributed to old landfills. The Governor's proposal would avoid placing an unreasonable

burden on any one local government and allow us to use our resources for actual cleanup rather than legal action. When old landfill sites were in use, North Carolina citizens, businesses, and industries benefited from their existence as a place to dispose of waste. The surcharge on waste disposal is a way for citizens, businesses, and industries to form a partnership for cleanup and redevelopment of these old landfill sites.

There is great interest this session of the General Assembly in strengthening requirements for landfills permitted in North Carolina. I encourage you to take a close look at legislation that will be introduced, specifically this initiative and what it can bring to your jurisdiction.

If you have questions regarding the program for clean-up of old landfills, please contact Jack Butler, Chief of the Superfund Section, at jack.butler@ncmail.net or call (919)508-8450.

Sincerely,

A handwritten signature in dark ink, appearing to read "Dexter R. Matthews". The signature is fluid and cursive, with the first name "Dexter" and last name "Matthews" clearly distinguishable.

Mr. Terry Bralley
County Manager
123 South Main Street
Mocksville, North Carolina 27028

Re: Request for Information on old unlined landfills, Davie County.

Dear Mr. Bralley,

The Division of Waste Management, Superfund Section, Inactive Hazardous Sites Branch (Branch) is in the process of cataloging old landfills in the state. This letter is being sent to you to solicit your cooperation in providing information on old unlined landfills that are not subject to Division of Waste Management, Solid Waste Section post-closure regulations in your county. This process is a part of a statewide effort to accurately inventory old dumpsites to aid in safe reuse and to protect public health and the environment.

Once an old landfill site has been identified, the site location, site usage, and vicinity usage is researched. Potential hazards to the public and the environment are then evaluated by risk assessment. Sites then are reviewed based on risk and/or by safe redevelopment requests.

The Branch then works with owners and responsible parties on final solutions for containment of the waste and to ensure safe reuse of the old landfill sites. Safe reuse might involve engineering controls to prevent exposure to wastes, if necessary, and restrictive covenants limiting the property to certain uses and setting conditions for construction or other soil disturbing activities. Annual reporting that restrictive covenants remain in place will be a duty of the current owner.

Known old landfills/dump sites are maintained in a database. Attached is a listing of known sites located in your county. Available information that may include location and years of operation information for each site is also listed. Please review the list and verify or provide information that will more accurately characterize the site(s). If you have knowledge of sites not included on the list, please add the additional sites along with location information, directions, years of operation, and any additional notable information.

Please return the list and any additional information within 90 days to:

Cheryl Marks
Inactive Hazardous Sites Branch

Mocksville, N. C. 27028

Sir,

On a recent visit to the Davie County landfill it was discovered that Phase I of the landfill operation was rapidly approaching completion. In order to facilitate the move from Phase I to Phase II, site approval plans and operational plans should be submitted at the very earliest possible date.

I have enclosed a copy of the 'Solid Waste Management Rules' for reference as to required information for site approval and operational requirements.

Also, a sign must be posted at the entrance to the landfill which states; "No hazardous or liquid waste can be received without written permission from the Division of Health Services". This should be done as soon as possible.

If I can be of any further assistance, please contact me.

Sincerely,

Steve Phibbs
District Sanitarian

Subject: Land Disposal of Trash,
Davie County

Dear Mr. Perkins:

On July 2, 1979, this office investigated a complaint from Mrs. Lynn Lien (telephone 998-3876) about her neighbors dumping trash in a stream bed on land that adjoins her property. Upon investigation it was found that trash is being dumped in a dry creek bed.

An easy access to the dump site is from Mrs. Lien's residence. Mrs. Lien's residence (Little Creek Stables) is located on Highway 64 west in the Fork Community .8 mile west of the junction with Highway 801.

This problem is being referred to you since it is a solid waste disposal problem.

Should you require additional information regarding this disposal site, contact our Winston-Salem Regional Office.

Sincerely,

Fin Johnson
Regional Supervisor

December 5, 1977

Mr. Joseph Mando
Sanitarian Supervisor
Davie County Health Department
Post Office Box 57
Mocksville, North Carolina 27028

Dear Mr. Mando:

On November 21, 1977, you and I made a survey of the solid waste storage facilities at the Davie County Schools. Our survey was in response to an inquiry regarding flies. Listed below are my observations and comments:

1. Waste was stored very near the kitchen door at all schools except Shady Grove Elementary School. Waste storage should be arranged so as to permit a break between the kitchen area and the waste storage area.
2. Adequate storage capacity, properly constructed and properly maintained waste storage facilities, should be available at all times. The most obvious deficiency in this regard was the storage of food scraps. Food scrap storage in dirty 55-gallon drums was observed. The scraps should be stored in standard garbage cans with tight fitting lids. The cans should be kept clean.
3. Cleaning of can washing and waste storage areas should be emphasized.
4. Responsibility for cleaning bulk containers should be made clear.

I trust that this information will be helpful to you. If this office can be of further service, please call.

Sincerely,

Julian M. Foscue III

REPORT OF INVESTIGATION OR INSPECTION OF Solid Waste Complaint

Place visited Robert Ellis Farm Date March 31 1977
Address Route #3, Mocksville, N. C. 27208 Time spent 1 hour
By whom Mr. Joe Mando, Sanitarian, Davie County Health Department
Mr. Julian M. Foscue, III, District Sanitarian, Division of Health Services
Persons contacted Mr. Robert Ellis - Owner
(Owner, agent, tenant, manager, other)
Reason for visit Complaint to local health department
Copies to: Mr. Robert Ellis, Route #3, Mocksville, N. C. 27208
Mr. Joe Mando, Sanitarian, Davie County Health Department, P. O. Box 57,
Mocksville, N. C. 27025

REPORT:

At the request of Mr. Joe Mando, an inspection was made of Mr. Robert Ellis' field adjacent to his home on Cornatzer Road in Davie County. The March 31, 1977 inspection was in response to a complaint to the Davie County Health Department regarding blowing bread wrappers in the above mentioned Ellis field. At the time of our inspection, bread wrappers were observed in the Ellis field.

Conversation with Mr. Ellis revealed the following:

1. Mr. Ellis feeds bread (in wrappers) to his hogs;
2. Mr. Ellis advised us he was having the feeding area cleaned. The bread wrappers and manure had been spread over the field;
3. Mr. Ellis plans to incorporate the wrappers and manure into the soil by plowing as soon as weather conditions permit.

CONCLUSION:

1. As stated above, Mr. Ellis indicated he would incorporate the wrappers into the soil as soon as weather conditions permit. It is necessary that this be accomplished within 30 days of the inspection date.
2. Future disposal must be in accordance with the Division of Health Services "Solid Waste Management Rules" and the Davie County Solid Waste Ordinance.

Mr. R. J. Duncan
Sanitarian
Davie County Health Department
P.O. Box 57
Mocksville, NC 27028

Dear Mr. Duncan:

The purpose of this letter is to confirm our conversation regarding a small dump on the Virgil Foster property, Route 4, Statesville, North Carolina.

It is my understanding that you had previously received a complaint concerning this disposal area, and that Mr. Foster agreed to properly close the area.

On January 31, 1977, we made an inspection of the area, which was not properly closed. After the inspection we talked to Mrs. Virgil Foster. Mrs. Foster advised us that her husband had planned to eliminate the disposal area, but suffered a heart attack. Since the heart attack, Mr. Foster's father died (two weeks ago). Mr. Foster is now in the hospital with blood clots.

In view of the above, it is recommended that no action be taken at this time.

If this office may be of help, please call.

Sincerely,

Mr. Ron Fogler, County Manager
Davie County
Mocksville, North Carolina 27028

Dear Ron:

You will recall that back in April 1976 I discussed with you the problem of open garbage dumping from a local camp ground. Your Health Department Supervisor was out here some time back and I showed to him those conditions I discussed with you. He said at the time he would advise me of the violator's comments. Since then I have heard nothing.

Now, this intolerable and filthy condition has gone on long enough and I ask your cooperation in your personally coming out for a visit and I will show you first-hand that not many decent people would put up with these conditions. Raw garbage, bottles, cans, papers, mattresses and anything that would normally be taken to the County dump have been and continue to be dumped almost on my property and are washed by the rain and blown by the wind onto my property. In addition, there are huge rats bigger than your arm that run freely back and forth from the dump to our house.

May I once again plead with you to assist me in stopping this immediately and, as you know, this is my third request.

Sincerely,

JHR

RALEIGH, NORTH CAROLINA

REPORT OF INVESTIGATION OR INSPECTION OF Solid Waste & Fly Problem

Place visited Robert Ellis Farm Date August 26, 1975
Address Cornatzer Road, Mocksville, N. C. Time spent 1 Hour
Charles King, Davie Yadkin Health District, Mocksville, N. C.
By whom Julian M. Foscue, III, District Sanitarian, Division of Health Services
Persons contacted Mrs. Robert Ellis
(Owner, agent, tenant, manager, other)
Reason for visit Request for Assistance from Mr. King
Copies to: Mr. Charles King, Sanitarian Supervisor, Davie-Yadkin Health District,
Hospital Street, P. O. Box 57, Mocksville, N. C. 27028

REPORT:

At the request of Mr. Charles King, Sanitarian Supervisor, Davie-Yadkin Health District, a visit was made to the Robert Ellis hog farm. Mr. Ellis feeds bread (in wrappers) to his hogs.

At the time of our visit, the following observations were made:

1. Bread wrappers were scattered along the State road and in the pastures near the feeding area.
2. In areas where leftover bread was observed, flies were numerous.

Recommendations regarding existing waste:

The existing wrappers and leftover bread should be buried on site or collected and hauled to the Davie County landfill. The Agriculture Department recommended that the waste be incorporated into the soil by plowing, preparing a seedbed, and reseeding. It appears that this would be a good way of burying the waste on site.

Recommendations regarding the future handling of wrappers:

1. The Agriculture Department recommended that the wrappers be separated at feeding time. This office agrees that this would be the best way to solve the litter problem. The wrappers could then be disposed of at the County landfill which is a short distance from the Ellis farm.
2. An alternate method would be to enclose the feeding area by fencing. The accumulation of wrappers in the feeding area should be collected and disposed of at the County landfill as often as necessary to prevent the creation of a nuisance or insanitary condition.

Report of Investigation of Solid Waste & Fly Problem
August 26, 1975
Page 2

Recommendations regarding leftover bread:

1. The amount of bread fed should be commensurate with the amount the swine will consume, as this would keep waste to a minimum.
2. Leftover bread should be removed from the feeding area at least twice per week so as to minimize fly breeding. The waste could then be incorporated into the soil by plowing or could be transported to the Davie County landfill.

NOTIFICATION REFERRAL

ACTION REQUESTED

TO: Name B. Gene Barrett, Planning Officer

Agency State Bd. of Health

Re: Clearinghouse Notification No. 71 - 0427

The attached Notification to Clearinghouse of Intent to Apply for Assistance is referred to you for review and comment in accordance with Project Notification and Review System procedures established under Bureau of the Budget Circular No. A-95.

RESPONSE REQUESTED BY February 23, 1971

In each response, please refer to the Clearinghouse Notification No. shown above. If your agency does not wish to submit written comments, you may respond by telephone.

It is recommended that you contact the applicant directly if your agency needs additional information on the proposed application, or if there are any questions which may be resolved in this way.

Please reply to: Clearinghouse and Information Center

116 West Jones Street

Telephone 829-4375

3. DESCRIPTION AND PURPOSE OF PROPOSED PROJECT

A. DESCRIPTION

Solid waste collection points and disposed in sanitary land - fill as
planned and recommended by North Carolina State Board of Health.

B. PUBLIC INTEREST AND NECESSITY

Much public interest in solid waste disposal has been shown since it
is no longer permissible to burn refuse due to state regulations on
air quality control. The public must have available means of
disposing their solid waste and we believe this project will provide
the solution.
